Getting started.

Installation

1. Remove the cap on the end of the USB modem
2. Pull out USIM holder and slide your USIM into holder as shown
3. Slide the holder back into your USB modem - make sure it's facing the correct way

Connecting your USB modem and computer.

You can connect your USB modem to your laptop or computer in two ways. The easiest way is to insert it directly into the USB port. The other option is to attach it using the cable supplied. Once you're connected the light under the **3** logo will change from green to blue. Note that user must have administration privileges for this PC.

Installing the USB modem software.

Once you're connected, the software will automatically install itself. You'll first see a new icon in the status bar (see below) and this shows that the USB modem and computer have been connected without any problems.

After a few seconds, the installation will automatically continue. Then just follow the on-screen instructions and wait until you can start using the mobile internet.

If you own a Mac

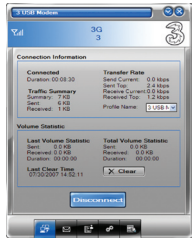
All the drivers you need are installed on your USB modem, so all you have to do is connect your device and then wait for the installation wizard to appear. Then, just follow the on-screen instructions.

Disconnecting the USB modem

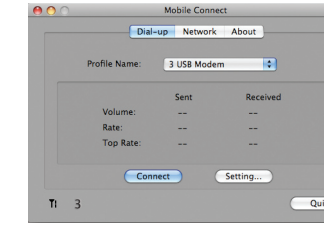
To make sure that your remove the USB modem safely, please disconnect in the correct way.

How to use your USB modem.

Once the software is installed, all you need to do each time you want to use your USB modem is connect it (see page 4 for a quick refresh) and then wait for the following screen to appear. It should take about 30 seconds and when it pops up click on **Connect**.



PC version



Mac version

The network will show you if your connection is successful. Then you're ready to start using the internet, just like you would do on any other computer.

To end your internet session, just click on **disconnect**.

Usage and safety instructions.

General safety

- The use of electronic transmitting devices is forbidden in aircraft, at petrol stations and in hospitals. Please observe and obey all warning signs and switch off your modem in these conditions.
- Operating a portable PC and USB modem may interfere with medical devices like hearing aids and pacemakers.
- Be aware of warning signs in places such as oil refineries or chemical factories where there are explosive gases or explosive products being processed.
- Store the USB modem out of the reach of children. The USB modem may cause injury if used as a toy or may be damaged by rough play or moisture.

Using your USB modem

- Only use original accessories supplied by the manufacturer. Using unauthorised accessories may invalidate your warranty.
- Avoid using the USB modem near or inside metallic structures or establishments that can emit electromagnetic waves.
- The USB modem is not waterproof, please keep it dry and store it in a cool place out of direct sunlight.
- Handle the USB modem with care. Don't drop, bend, knock or treat it harshly to avoid damage to the unit.
- There are no user serviceable parts. Dismantling the unit will invalidate the warranty.
- Operating temperature range of -20 °C to 60 °C and humidity 5% to 95% are recommended.
